Welcome to the Shadybrook Farm 2026 Production sale.

The past two years have been particularly meaningful for the development of our herd. Gilman's Greens Fork was purchased at the top of the 2023 OKC Summit National Sale. He has done an outstanding job in siring some of the most impressive calves we have ever had. Many of these Open Heifers and Bred Heifers in this sale are his progeny.

JSF Times Square continues to impress; he has not only been the most consistent low birthweight sire we have ever used—he has also produced show heifers and several young cows that anchor our herd today. Several bred heifers in the sale are bred to him, and several of the bred females are sired by him.

The influence of JSF Outback, the record high selling bull in which we own Canadian Semen Rights, will be a sale feature. The donor cows and their calves speak for themselves—among the best we ever produced and offered. We are proud to be offering these outstanding genetics in our sale.

I hope you will be able to join us—in person or online.

Laurence Pathy

SALE INFORMATION

REGISTRATION AND TRANSFER All animals sell with complete pedigrees and will be transferred to the buyer. Be sure to provide accurate transfer information to the sales clerk at settlement. Both the ASA & CSA registration numbers are included in this catalog. For Canadian buyers, included in the footnote you will find the percentages for the CSA Appendix registry herd book. Any pending CSA registration numbers & percentages will be available sale day. United States buyers will receive an American Shorthorn Association registration paper.

TERMS OF THE SALE Settlement must be made with the clerk immediately following the sale with cash or check and before cattle are removed from the premises.

BILLED ACCOUNTS All billed accounts are due within 10 days following the date of the sale.

INSURANCE will be available for your purchases at the sale. Contact the clerk at the settlement desk.

LIABILITY Each animal will be at the buyer's risk as soon as sold but will be cared for by the seller for a reasonable amount of time. Neither the owner, employees, auctioneer, sale manager nor other afflicted personnel can be responsible for any accidents, but they will make every effort to provide for the safety and comfort of those attending.

BREEDING GUARANTEE All cattle will sell under the Standard Breeding guarantee as endorsed by the American Shorthorn Association and the Canadian Shorthorn Association.

MAILED BIDS If unable to attend the sale personally, your mailed or telephoned bids will be handled in a most confidential manner. Simply contact one of the Sale Representatives listed.

EXCHANGE RATE The US dollar is worth approximately 25% more than the Canadian dollar. Example \$10,000 purchase price in Canadian Dollars = approximately \$7,500 U.S. The exact exchange rate will be announced/fixed on sale day.

DELIVERY We will arrange to have cattle delivered to a central U.S. or Canadian point for an amount not to exceed \$750 per lot. Purchases totaling over \$20,000 will qualify for free delivery.

FOR U.S. BUYERS we will provide all necessary health requirements and documentation for export of live cattle, at no cost. International Transportation provided by H.S. Knill Co. Ltd. Paris, Ontario 877-442-3106.

HEALTH The Shadybrook herd is brucellosis free and is annually vaccinated for respiratory and reproductive diseases and treated with Ivomec.

GENETIC CONDITIONS All cattle selling will be TH, PHA & DS free unless otherwise specified.

PHOTOS Allan Browarny (*Show Champions*), Jade Noiseux (*Conception JN*) — **CATALOG** Katie Songer (*Top Stock*)

PERFORMANCE DATA The Expected Progeny Differences (EPDs) represented in this catalog are generated through the American Shorthorn Associations Digital Beef program and reflect the latest run. Definitions for the traits listed in this catalog are:

CALVING EASE DIRECT (CED) The most important EPD in sire selection for use on heifers. This value is expressed as a percentage of unassisted births; the more positive a number is the more desirable.

BIRTH WEIGHT (BW) An indicator of birth weight and calving ease. Larger BW EPDs typically but not always indicate more calving difficulty.

WEANING WEIGHT (WW) Weaning weight measures the differences in weight of calves at weaning and is also reported in pounds. A higher WW EPD indicates an expected higher weaning weight.

YEARLING WEIGHT (YW) Like other weight traits, YW measures the differences in weight of animals at yearling and is also expressed in pounds. Higher YW EPDs indicate a higher expected yearling weight.

MILK (MK) the expected differences in a bull's daughters' calves at weaning weight due to their milking ability. Milk is looking at how well daughters milk and how that translates to the weaning weights of their calves. A higher MK EPD indicates a higher weaning weight due to the bull's daughters' milking ability.

BRITISH MATERNAL INDEX (\$BMI) This multi-trait selection index attempts to measure a bull's potential profitability when complimenting the British cow base (Angus, Red Angus, Hereford, etc.). Shorthorn females can likewise be gauged at adding value to British or British Composite bulls of other breeds. A balance of growth and carcass traits is desired with a strong maternal component aimed at optimum reproductive efficiency and cow longevity.

OTHER IMPORTANT SALE INFORMATION

EMBRYO LOTS Embryos represented as sexed female embryos that result in pregnancies will be guaranteed to produce heifer calves and guaranteed exportable to the USA. On frozen embryo packages of 4 embryos, the buyer is guaranteed one pregnancy if put in by a certified embryo technician.

U.S. EMBRYO SHIPMENTS All health documents required for export will be provided at no cost. All shipping and import documentation costs are the responsibility of the buyer.

FLUSH RIGHTS Shadybrook reserves the right to one successful flush of six or more embryos at our expense and buyer's convenience on all females selling.

ANNOUNCEMENTS made sale day will take precedence over printed material in this catalogue.

VIDEOS of the sale cattle are available at www.youtube.com/ShadybrookShorthorns

The Valentine cow family has been a cornerstone of the Shadybrook program since 1976.

Valentine 75F, pictured below, is the 6th generation direct descendant of Scotsmorr Valentine 50H, a female we purchased at the 1976 Canadian Western Agribition Sale. She was one of the very first females owned by Shadybrook.

50H descendants have consistently demonstrated the qualities we most value in our cow herd: maternal strength, soundness, functionality, longevity (50H had her last calf at age 17) and ability to raise valuable offspring.

Valentine 75F's genetics have been further strengthened by those of her sire, Shadybrook Hotshot 88A. His dam, Shadybrook Veronica 92Y—also a leading donor cow—was Grand Champion Female with Hotshot at side in 2013 at the Toronto Royal Winter Fair. Hotshot was Grand Champion bull as a 2 year old there in 2015. He became our leading herd sire, and his offspring have had a great influence in our program.

A proven & prolific donor, Valentine 75F is without a doubt a star in the 50-year history of the cow family. This offering represents our commitment to offer the best genetics possible from the very top of the herd.

With pride, we are offering choice of two of Valentine 75F's three, 7th generation daughters, impressive potential show heifers and future donor cows that should perpetuate the Valentine story.

After nearly 50 years, the Valentine family remains an important part of our breeding program. We are proud of the females that have carried this name through the generations and even more excited about the future. The young Valentines represented in this offering reflect the longevity, consistency, and maternal excellence that have made this family such an important part of our herd since 1976. **CSA 96.7%**

Purchased as a calf at a Cates Farms Star Search sale, Caroline 161 is fast becoming one of our feature donor dams. Her ability to consistently produce exciting, attractive progeny with fault-free design, sound structure and functionality with style is second to none.

As proof of her breeding abilities is the Gilman's Greens Fork daughter, Shadybrook Carolyn 102M ET purchased in our 2024 Production Sale by John Wells of Texas. She was campaigned very successfully by John throughout 2025 and early 2026. Among her successes was winning the Grand Champion female at the 2025 Houston Junior Shorthorn show as well as again at the 2026 Fort Worth Junior Show. **CSA 88.9%**

BYLAND EAGLES RELOAD
BYLAND ELLEN 2ER93
 BYLAND ELLEN ORW123

We unfortunately lost Byland Winchester 7M77 at a young age. He left us with stout featured, easy fleshing daughters.

EPDS - CE 12 BW 1.5 WW 64 YW 91 MK 24 \$BMI 157.11

SHADYBROOK PERFECT 73H

SHADYBROOK PERFECT 20C

Shadybrook Guinness 9L is a proven calving ease sire that we have used extensively on heifers the past 3 years. His calves grow well and as you see by the two yearling daughters selling they will become functional and valuable breeding subjects. **CSA 97.8%**
